HARSH SAHU

FULL-STACK & FRONTEND DEVELOPER

+91 93351 69651 | harshcse430@gmail.com

Portfolio / GitHub / Harsh43054 / LinkedIn

Computer Science student building responsive interfaces, full-stack web applications, and practical AI experiences. Hands-on work with Next.js, Supabase, and interactive learning tools. Seeking software development or frontend internships across India.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, Java
Web & backend: HTML5, CSS3, React.js, Next.js, REST APIs, Supabase Auth, PostgreSQL, Row Level Security
Tools & foundations: Git, GitHub, Vercel, Firebase, Figma, Gemini API, OOP, DSA, DBMS, Operating Systems

SELECTED PROJECTS

Agriculture Doctor | Full-stack farming workspace

Next.js / TypeScript / Supabase / PostgreSQL / Gemini / Vercel | Live app / Source

• Built a farming dashboard for plant photo assessments, measured soil readings, local weather, and scan history.

• Implemented authenticated accounts, user-owned PostgreSQL records, private image storage, and Next.js API routes; integrated Gemini image assessments and Open-Meteo weather.

• Added image validation, analysis quotas, and Row Level Security; verified 12 automated tests and production CI.

Virtual C++ Programming Laboratory

HTML / CSS / JavaScript | Live lab / Source

• Created interactive theory modules, coding exercises, program demonstrations, and quizzes covering C++ fundamentals, OOP, file handling, and STL.

Compiler Design Virtual Lab

HTML / CSS / JavaScript | Live lab / Source

• Developed learning modules for lexical analysis, parsing, and code optimization with simulations and parse-tree visualization.

EXPERIENCE

UI/Frontend Developer | We4X AI Technologies and Studio

June 2026 - Present

• Built responsive interfaces and reusable UI components for community initiatives; refined layouts and event visuals for consistency across devices.

AI for Sustainability Virtual Intern | 1M1B

May 2026 - June 2026 / Remote | Project

• Built a ResNet-50 waste-segregation prototype and responsive image-upload interface with inference simulation, impact analytics, and Grad-CAM explanations.

Java Developer Intern | Codec Technologies

Core Java / OOP / DSA

• Completed practical Java training and coding exercises focused on object-oriented programming and foundational problem solving.

EDUCATION

B.Tech, Computer Science and Engineering | Expected 2026
Ambalika Institute of Management and Technology | CGPA: 7.5 / 10

LEADERSHIP & RECOGNITION

Secretary, CSI Ambalika and **Campus Lead, Open Source Connect India** (August 2026 - Present): coordinated chapter operations, technical events, and open-source outreach.

Community Manager, APYX (May - August 2026): organized CodeBlitz Hackathon and a technical workshop in Lucknow.
Coordinator, YUCI: supported campus sustainability workshops and campaigns.

Shortlisted: Smart India Hackathon and IEEE Ideathon. Completed ChatGPT & Generative AI Workshop at IIT Delhi; participated in E-Bootathon at IIT Kanpur.
